Forest Canopy Loss – Comparison with DLR

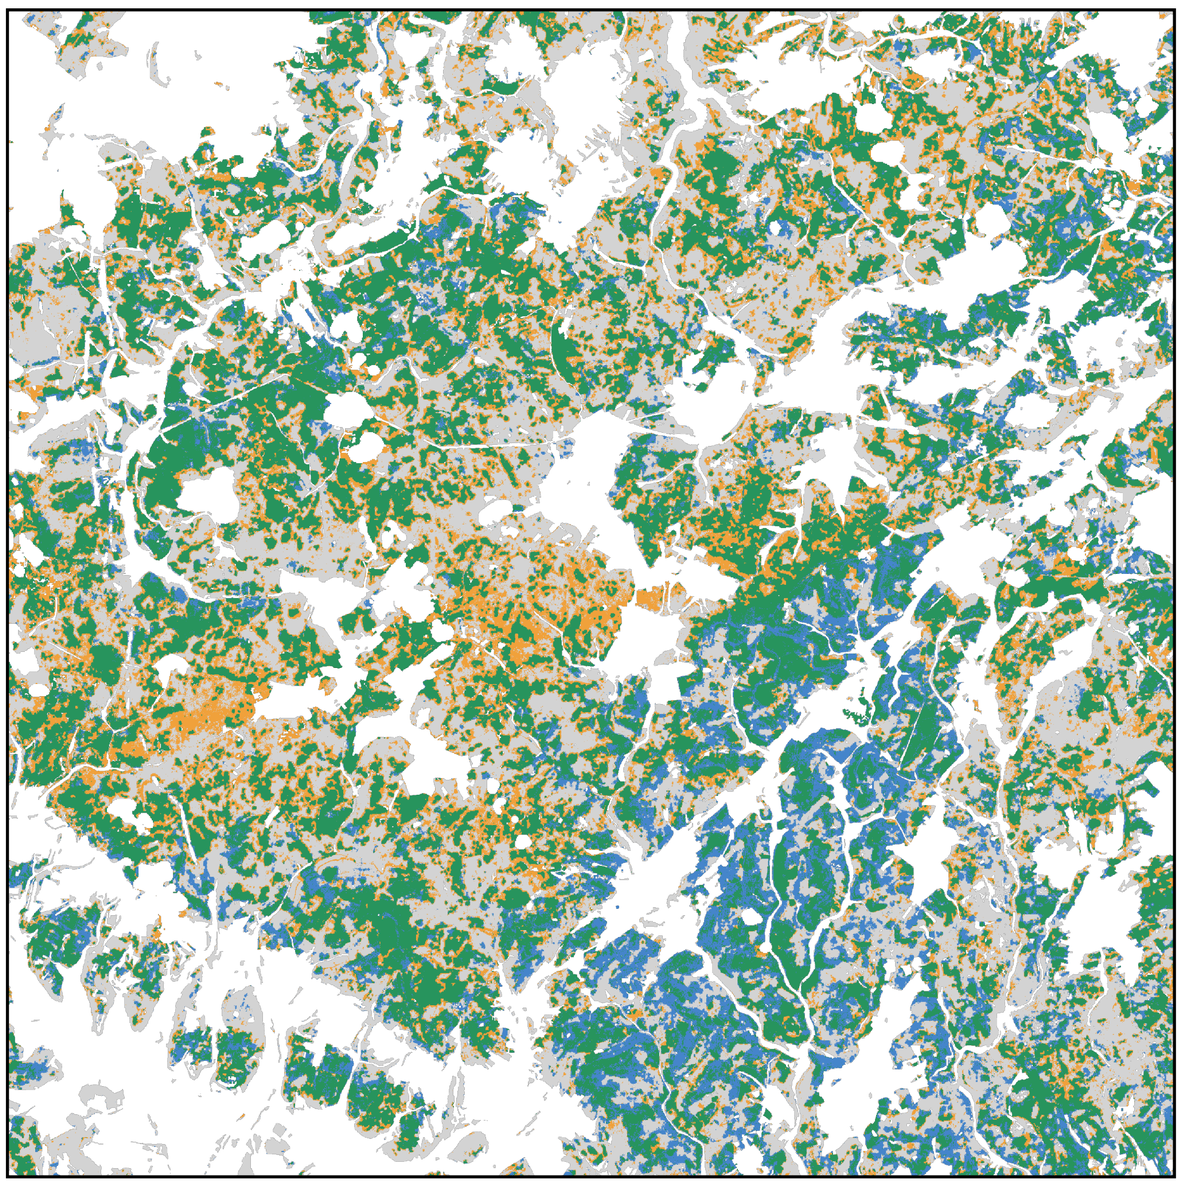

Southern Thuringian Forest, Germany | 1 July 2018 – 9 July 2024

ΔNBR-based Loss Classification

DLR Canopy Cover Loss (FCCL)

Spatial Agreement and Disagreement

Loss classification (top maps)

- No loss
- Detected Loss

Spatial agreement (bottom map)

- Own classification only
- DLR only
- Both detect loss
- Netiher detects loss

N

0 10 20 km

Data: Copernicus Sentinel-2 L2A (2018, 2024); Thünen Institute forest mask (2018); DLR FCCL
Method: ΔNBR threshold classification (−0.125), compared with DLR canopy loss (Aug 2018 – Jun 2024)
Comparison area: 42,948.42 ha
Map & analysis: Alexander Maier
Projection: WGS 84 / UTM Zone 32N (EPSG:32632)
Resolution: 10 m
